## Tentang

I am a Diploma Student in Digital Accounting with a strong interest in tax accounting and system development. Currently, I am focused on developing my knowledge in taxation as well as enhancing my UI/UX skills to support the creation of innovative and impactful systems.

I aspire to build a career as a Tax Accountant or System Analyst in a leading company by combining my expertise in accounting and technology. For me, work is not only about achieving professional success, but also about building independence, improving self-quality, making my family proud, and creating a positive impact through the work I do, both for the company and for myself.

The vision I hold for both the present and the future is to be courageous in taking every opportunity, even when it involves the risk of failure, while maintaining a positive mindset. This aligns with my commitment to continue my education to a higher level and to keep growing by trying new things beyond my comfort zone.

🎯 What do I see myself in the next 2–5 years?

In the next 2–5 years, I see myself becoming a successful career woman working as a Tax Accountant or System Analyst in a top company. This aligns with my goal of building a career in these fields by combining accounting knowledge and technology to deliver innovative and impactful solutions.

Alongside gaining professional experience, I am also committed to continuing my studies to a higher bachelor's degree to strengthen my knowledge and enhance my qualifications as a professional.

Besides that, I would become a financially independent woman, gain valuable work experience, and have the opportunity to explore Indonesia's natural richness as well as travel abroad.

This goal is important to me because, as a woman, I aspire to have a strong educational background and a successful career that makes my family proud. I also want to contribute to impactful system development, in line with the knowledge I have gained from my major (Digital Accounting). I believe growth is a continuous process. Therefore, I am determined to keep learning, try new things, and step out of my comfort zone to become the best version of myself.

Step by step, I'm building the future I want⭐
